

'Making a Mark'

Mark Holder Social Impact Declaration

Ideal for All Ltd

Ideal for All is run by and for disabled people in the borough of Sandwell in the West Midlands, providing a range of social and healthcare services to support disabled people, carers and disadvantaged groups, enabling them to live independently.

Our services are available to Sandwell residents and not just disabled people. We also receive enquiries from families, carers and professionals.

We are a major local and national advocate for the needs of disabled people, forming new networks and partnerships with neighbouring boroughs to progress its mission of equality for all. All our services are led by people that use and understand our services, and this is why the user-led philosophy lies at the heart of all that we do.

The Social Enterprise Mark criteria includes a requirement for all applicants and renewing Mark Holders to provide 'social impact statements', which illustrate how they are striving to meet their social/environmental objectives.

Below are examples of how **Ideal for All** is Making a Mark, striving to create a positive impact on people and planet.

Social inputs – providing employability skills

We have delivered a range of services through our 'Grow for Work' project; a fully integrated health, wellbeing and employability 12-week programme, with 'wrap-around' engagement and post-employment support.

This project is targeted at unemployed and economically inactive social housing tenants with disabilities, health conditions and experiencing multiple disadvantage who reside in Princes End, Tipton.

Social outputs – key measures of service provision

We have delivered a variety of employability and social care services to **111** people.

Working in partnership with a local Housing Association, we have acquired premises to deliver services in the heart of the community 5 days a week.

Together with other partners we have delivered several community based events most notably a very successful Christmas event that included presents for the children and a range of donated clothing for low income families.

Social outcomes – supporting people into work

4 people have been supported into employment.

Though our work with residents we have delivered a wide variety of short horticultural programs, which has led to the planting of flowers and shrubs across the estate positively changing the look and feel of previously drab, underutilised areas.
